Facilities – Lighting and sound proofing in studios

Modifications underway

Faculty & faculty support– 3 positions

Search for 2 positions coming to conclusion & 1 more position promised for 07/08 search – faculty support still needed

Staff – Computer Tech and Industrial Shop Tech appointed

Enrollment – Proposed Limited Access Plan Approved

College of Architecture, Urban and Public Affairs

School of Architecture

- 4 students selected to participated in Fallingwater College Residency Program
- Student team participated in student design charette AIA/AAH annual conference – $5,000 grant from AAH for student expenses
- AIAS chapter of Freedom by Design – students work with a mentor to design, permit, construct small projects improve handicap accessibility
- Design studio students working with Food Shelter & Health Ministries to design school/orphanage master plan for facility outside of Kampala, Uganda

College of Architecture, Urban and Public Affairs

School of Architecture

- Students designed & built 3 information kiosks 2 are placed in FTL UD studio and Boca LD studio with webcams connecting both campuses – 3rd kiosk lobby of Askew Tower for student exhibitions
- Faculty developing new digital design course ware for BIM and Digital Fabrication – some of the software has been obtained & negotiating a grant for remaining hardware and software for teaching lab

Digital Fabrication

Athletic Club for Lauderdale By The Sea, Florida by Nick Mantis

Digital Fabrication

The first 10% of the product development process can affect about 80% of the product's total cost? Amazing!

But what's even more amazing is how functional 3D models and parts, created on a Dimension printer, enable you and your design team to make smarter design decisions. The result: Fewer design changes, better product designs, lower production costs and a shorter time to get your product to market.

3D printing has never been more affordable and a Dimension 3D Printer can pay for itself faster than you think.

The Dimension product line features four printers which operate in an office environment.

Each printer produces the same high quality ABS models that allow you to test for form, fit and function.

You simply click "print" and your design is sent to the printer. All our networked printers are very easy to install and operate. Each printer runs on our Catalyst® EX software which automatically imports STL files, orients the part, slices the file, generates support structures (if necessary) and creates a precise deposition path to build your ABS model. Multiple models can be packed within the build envelope to maximize efficiency. Dimension 3D Printers run unattended and provide system and build status information at your computer.

Breakaway Support Technology Printers

Dimension BST 768
8 x 8 x 12" Build Size
203 x 203 x 305 mm

Dimension BST 1200
10 x 10 x 12" Build Size
254 x 254 x 305 mm

The Dimension BST 768 and 1200 (Breakaway Support Technology) Printers are network compatible and produce durable working models from ABS with the click of a button. Once the model is printed, simply remove the model from the printer, peel away the supports and begin using the functional model.

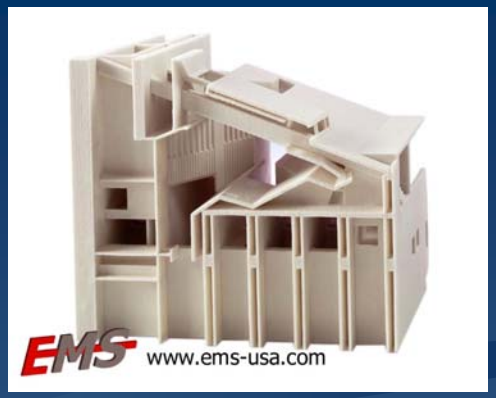

Soluable Support Technology Printers

Dimension SST 768
8 x 8 x 12" Build Size
203 x 203 x 305 mm

Dimension SST 1200
10 x 10 x 12" Build Size
254 x 254 x 305 mm

The Dimension SST (Soluble Support Technology) Printers incorporate the same technology as the Dimension BST Printers to create high-quality working ABS models. The difference is that Dimension SST Printers feature an automated support removal process. You simply remove the model from the system and place it into an agitation bath and a concentrated solution to automatically wash away the support structures. Essentially, the Dimension SST Printers allow for "hands free" printing.

"Manufacturers' worldwide list price. Additional options, shipping, applicable taxes/duties not included.

College of Architecture, Urban and Public Affairs

School of Public Administration

MPA Accreditation*

Faculty salaries – cited as inadequate and falling behind those of comparable institutions

Support funding – cited as inadequate, e.g., faculty start up, travel, equipment, supplies, etc.

Staff support – cited as inadequate, e.g., clerical support, advising, etc.

Marketing – cited need for marketing plan for student recruitment

*Preliminary results of site visit.

College of Architecture, Urban and Public Affairs

School of Public Administration

- Faculty cited by *Journal of Public Affairs Education* rank 6th in nation in scholarship & tied for 3rd in scholarship of grad students
- Faculty and Ph.D. students working on *Statewide Funding Analysis Framework* project with Broward Coordinating Council
- Public Procurement Research Center hosted Bulgarian delegation thru Open Government Initiative Project – anti corruption measures in public works and contracts administration

College of Architecture, Urban and Public Affairs

School of Public Administration

- Partnered with Center for Nonprofit Excellence WPB to offer Nonprofit Academy – training program in management for non profits
- Hosted National Anti-Essentialism Conference in Fort Lauderdale
- Partnership with Miami Dade Commission on Ethics – training program, *Accountability in Public Procurement*
- Developing fully online nonprofit management assistance resource library with Center for Non Profit Excellence

College of Architecture, Urban and Public Affairs

Department of Urban and Regional Planning

MURP Accreditation

Faculty – 2 additional positions

1 currently being hired

VPT* Lab – Faculty member who specializes in GIS** and a GIS Lab Tech – done

Funding for VPT Lab equipment and faculty support

Allocated new funds for VPT Lab equipment

Marketing for recruitment of students

*VPT = Visual Planning Technology Lab

** GIS = Geographic Information Systems

College of Architecture, Urban and Public Affairs

Department of Urban and Regional Planning

- Organized & hosted 5th annual Environmental Ethics Conference
- Students organized first Planning Career Fair at annual conference of Florida Chapter of APA*
- 2 /3 years student won Student Planner of the Year Award from Florida Chapter of APA
- Collaborating with School of Architecture, developed 4 D model for cities which can be used for airports, ports, harbors & other public facilities for security, planning, zoning, & other activities
- Collaborating with School of Architecture 6 credit 12 day intensive course, "The Informed City" developed 4 D model of downtown FTL

*American Planning Association

College of Architecture, Urban and Public Affairs

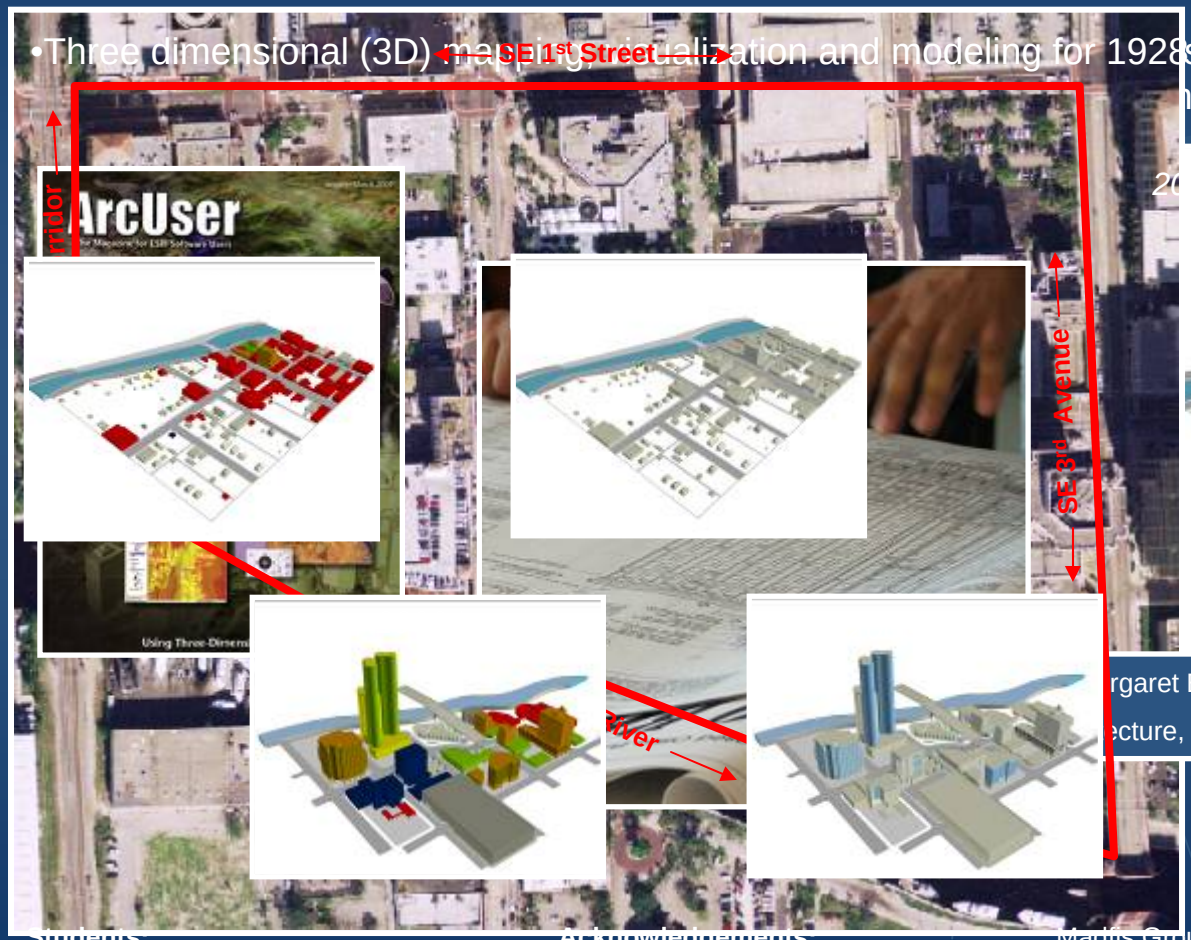

Department of Urban and Regional Planning

- Celebrated 5th anniversary of Adopt-a-Waterway Program with Broward County and the South Florida Water Management District

- Faculty presented papers at 12 conferences including WFIS-UN Summit on Information Sciences in Tunesia, Annual AESOP Conference in Austria, PISTA conference in Orlando, & Digital Communities Conference in Italy

In[form]ed City

A joint effort between the Department of Urban and Regional Planning, the School of Architecture, the Visual Planning Technology Lab, and the Broward Community Design Collaborative.

- Three dimensional (3D) mapping, visualization and modeling for 1928, 2006 and 2008 participation, as well as
- Study area: Downtown Fort Lauderdale
