Catalog _____

Department Dept. of Electrical Engineering and Computer Science / School of Public Administration

College College of Eng and Comp Sci / College of Arts & Letter

Program Name

Bachelor of Science in Artificial Intelligence with Public Management

☑ **New Program***

☐ **Change Program***

Effective Date
(TERM & YEAR)

Fall 2026

Please explain the requested change(s) and offer rationale below or on an attachment.

The new program, Bachelor of Science in Artificial Intelligence with Public Management (B.S.A.I.), is part of the university's AI+X initiative, which integrates artificial intelligence with other disciplines. This specific program combines AI and computer science with public management aiming to prepare graduates for careers in civic technology, data-informed policy, and smart government. It is jointly administered by the School of Public Administration in the Dorothy F. Schmidt College of Arts & Letters and the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science.

See attachment for details.

*All new programs and changes to existing programs must be accompanied by a catalog entry showing the new or proposed changes.

MEMORANDUM OF AGREEMENT
FOR A JOINT DEGREE PROGRAM
BETWEEN THE
COLLEGE OF ENGINEERING AND COMPUTER SCIENCE
AND
THE DOROTHY F. SCHMIDT COLLEGE OF ARTS & LETTERS
FOR THE
Bachelor of Science in Artificial Intelligence with Public Management

Background: The technology landscape is evolving quickly with new fields such as AI, data science, machine learning, and cybersecurity directly impacting all walks of life and many job functions.
Graduates with an interdisciplinary education that combines core AI and computer science skills with a deep discipline major specific knowledge will be better equipped to adapt to these changes and would be highly competitive in the job market.

Florida Atlantic will lead in preparing this new generation workforce to meet the need. The Florida BOG has approved FAU's pre-proposal for a new bachelor's degree in artificial intelligence with a second discipline. The program is designed so that there is equal core coursework in AI/computer science and the second discipline. This proposed bachelor's degree was positively received, with other SUS sister universities indicating interest in developing similar programs. It is critical for Florida Atlantic to act promptly to maintain this momentum and lead with our innovative ideas and not lose ground to other SUS universities. This new degree would put FAU at the forefront of producing a new generation workforce with computational thinking, problem-solving, and discipline-specific knowledge applied to solve real-world problems. The new interdisciplinary degrees will emphasize the discipline major in the context of AI and computer science skills and knowledge. It is an exciting time for FAU to lead the State of Florida in innovative degree programs.

Student Interest: Students are eager to gain interdisciplinary AI skills to stay competitive in the job market. AI and computing skills will enhance the marketability and job opportunities of students with core knowledge of their discipline. Increased employer demand for computing skills in many disciplines indicates an opportunity for new degree programs to meet student demand.

Increasing Program Enrollments: The proposed interdisciplinary programs offer the benefits of a dual major without the additional credits required in a traditional dual major degree. A second major is an indicator of greater earnings than a single major alone. Reported high earnings in relevant occupations will attract prospective students to the program. Increased student interest is expected to increase enrollment and attract a new pool of students to our departments.

New Degree Programs: New interdisciplinary programs created in this mold shall be named as Bachelor of Science with a major in Artificial Intelligence with <*discipline*>, where discipline being Linguistics, Economics, Public Administration, Biology, Education, etc. The new interdisciplinary program will use CIP code 11.0199 across all colleges. The new degree program jointly between the School of Public Administration and the Electrical Engineering and Computer Science department shall be called ***Bachelor of Science in Artificial Intelligence with Public Management***.

Enrollment Credit: Enrollment credit from this interdisciplinary program will be reflected in respective Colleges based on the courses students take. The new degree program is expected to have approximately the same number of credits from AI/computer science and public management. Faculty from the Electrical Engineering and Computer Science department will teach all AI and computer science courses, while faculty from the Department of Public Administration will be responsible for teaching courses in public management.

Degree Credit: Both the Dorothy F. Schmidt College of Arts & Letters and the College of Engineering and Computer Science will be able to include the degrees and majors produced as a part of their respective College and Department metrics.

Home Department for Students: To promote belongingness and encourage participation and interdisciplinary engagement, students may express belonging to two home departments and will have access to the resources of both departments.

Academic Advising: Students in the program will be jointly advised by Electrical Engineering and Computer Science department and the School of Public Administration. Advisors in both units will receive training and coordinate student advising.

Program Coordination: Program coordination including accreditation and graduation audits will be supported by the Electrical Engineering and Computer Science department. Assessment of student learning outcomes will occur at the two departments.

Career Services: Students in the program will have access to career services resources in both departments. Students will have access to career preparation, internship opportunities, and industry mentors through the Electrical Engineering and Computer Science department.

Interdisciplinary Engagement: Curriculum shall include an interdisciplinary capstone course to offer students an opportunity to work with real-world problems with guidance from industry mentors. Departments are encouraged to create and offer at least one course jointly taught with faculty from EECS and Public Administration.

Diploma: The diploma will adhere to the standard format for FAU baccalaureate degrees but will specify that the degree is recommended by faculty from both colleges and will feature the signatures of both deans.

Program Intent: This interdisciplinary program is intended to produce graduates capable of building AI and computing systems and using AI tools and frameworks to solve domain problems. The program will equip students with durable skills to adapt to the dynamically changing AI landscape.

New Program Creation: This agreement shall not prevent either department from developing and offering new degree programs with different emphasis on AI in their discipline.

Program Withdrawal: A program can be terminated by either department in accordance with FAU and Florida Board of Governors procedures for program termination.

Bachelor of Science in Artificial Intelligence with Public Management

(Minimum of 120 credits required)

Admission Requirements

All students must meet the minimum admission requirements of the University. Please refer to the Admissions section of this catalog.

The Bachelor of Science in Artificial Intelligence with Public Management (B.S.A.I. – P.M.) is a multi-college, interdisciplinary program jointly administered by the School of Public Administration in the Dorothy F. Schmidt College of Arts and Letters, the Department of Electrical Engineering and Computer Science (EECS) in the College of Engineering and Computer Science. This program aims to prepare students with balanced training in AI/computer science and public management to meet growing workforce demand at the intersection of governance and technology.

Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Curriculum) and requirements for the college and major. Lower-division requirements may be completed through an Associate in Arts (A.A.) degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides.*

All courses not listed with the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

Degree Requirements

The minimum number of credits required for the Bachelor of Science in Artificial Intelligence with Public Management degree is 120 credits: 36 credits in the General Education Curriculum, 24 credits in AI core, 15 credits in AI electives, 21 credits in Public Management core, 12 credits in Public Management electives, 3 credits capstone course, 3 credits mathematics for AI, and 6 credits in free electives. This degree will be awarded to students who satisfy all admission and degree requirements.

Students must attain a minimum grade of "C" in Mathematics of Data Science, AI Core, AI Electives, Public Management Core, Public Management Electives, and AI Capstone.

Foreign Language Requirement

All students must satisfy the foreign language requirement for admission to the University.

Specific Requirements

Course Title	Course Number	Credits
General Education Courses**		**36**
Mathematics of Data Science	MAP 2192	**3**

AI Core Courses

Course Title	Course Number	Credits
Applications of Artificial Intelligence	CAP 2603	3
Introduction to AI	CAP 4630	3
Introduction to Data Science and Analytics	CAP 4773	3
Introduction to Software Design	CEN 3062C	3
Introduction to Programming in Python	COP 3035C	3
Data Structures and Algorithm Analysis with Python	COP 3410C	3
Analysis of Algorithms	COT 4400	3
Foundations of Computing	COT 2000C	3
Total AI Core Credits		***24***

AI Electives ***

Select 5 courses totaling 15 credits

Introduction to Web Programming	COP 3834	3
Introduction to Database Structures	COP 3540	3
Introduction to Natural Language Processing	CAI 4304	3
Trustworthy Artificial Intelligence	CAP 4623	3
Introduction to Deep Learning	CAP 4613	3
Python Programming	COP 4045	3
Introduction to Data Mining and Machine Learning	CAP 4770	3
Introduction to Large Language Models	CAI 4223	3
Applied Database Systems	COP 4703	3
Total AI Elective Credits		***15***

Public Management Core Courses (21)

Course Title		
Public Management and Administration	PAD 3003	3
Organizational Behavior and Administrative Communication	PAD 3104	3
Public Budgeting and Finance	PAD 4223	3
Managing People in the Public Sector	PAD 4414	3
Administrative Process and Ethics	PAD 4604	3
Quantitative Inquiry for Public Managers	PAD 4702*	3
Research Methods for Public Management	PAD 4704	3

Total Public Management Core Credits		**21**
Public Management Electives		
Select 4 courses totaling 12 credits		
Communication Skills for Public Managers	PAD 3438	3
Information Technology in Public Administration	PAD 3712	3
Introduction to Nonprofit Sector	PAD 4144	3
Funding for Nonprofit Organizations	PAD 4202	3
Financial Management of Nonprofit Organizations	PAD 4203	3
Public Budgeting Techniques and Processes	PAD 4228	3
Program Evaluation in Public Management	PAD 4320	3
Managing for Excellence in the Public and Nonprofit Sectors	PAD 4332	3
